10:45 AM – 12:00 PM	<u>Keynote</u> Finding Humor in the Crazy World of Emergency Services - Steve Berry - I'm Not An Ambulance Driver Closing Remarks	Peaks 4 & 5

HAVE A SAFE DRIVE HOME – DON'T FORGET TO BUCKLE UP!

Keynote - The Magic of Mighty Memory – An interactive “funshop” to help you access your hibernating memory. Learn about different learning styles and how they affect what we remember. Leave with a powerful technique that you can apply immediately on how to remember what you hear.

Identifying and Examining Juvenile Bomb-Making – The course delves into the mindset of a juvenile bomb-maker and highlights some examples drawn from actual cases. School bomb threats will also be discussed and their ramifications involving students, parents and teachers. The class is concluded with an overview of explosive devices most used by juveniles, along with some examples of improvised explosive devices.

Fireworks – What’s Legal and What’s Not – This breakout will give a brief history of fireworks in America. Information on which agencies regulate fireworks and how they do it; including DOT, CPSC, ATF, and State and Local regulating agencies. An overview of NFPA and IFC codes regarding fireworks will be provided as well as information on safety issues, types of consumer fireworks available and novelties, with focus on what is legal and not legal in Colorado.

Protect Your Identity –This workshop will give your agency information on how you can get cost free crime prevention seminars on identity theft, telemarketing fraud, mail & internet fraud, home improvement fraud, caregiver exploitations and predatory lending scams for your community.

The Anatomy of School Firesetters – This presentation will look at the anatomy of school firesetters from the perspective of seventeen school firesetters in Phoenix, Arizona. It will also dissect the motive surrounding the nation’s deadliest school fire. The presentation will include information on school firesetter motives, academic and psychological profiles, socio-economic statuses and prior firesetting histories.

Bad Driver – You Can Keep Them Off the Road – Motor Vehicle accidents are a public health issue and removing bad drivers from the road is the key. This presentation will discuss your importance in the drivers’ license suspension process.

Youth Firesetting: The Latest Research Parts One and Two - SOS Fires has recently completed two years of in-depth interviews with 120 youth and their families, each of whom had participated in a youth firesetting intervention program. The findings may have implications for youth firesetting programs in regard to recommended referral options due to the high number of youth that may have hidden neurological conditions.

After the Crash is the IMPACT – The “BUZZ” around town is all about the underage drinking panel, school programs and what scares youth more than death.

Motor Vehicle Collisions are a Crime Scene - The session will be a discussion about crash scenes as crime investigations. Key to this top is the importance of first responders needing to work together in the collection and preservation of evidence at the scene.

Meth Lab Awareness and the Effects on Children Parts One and Two – This session is a presentation of a research project about contamination and exposure to the hazardous chemicals and by-products found in methamphetamine drug labs and the effects they could have on the respiratory system and other targeted organs to both the first responders and the children living in these locations.

Careless Smoking and Fires – A fast paced discussion with an image-packed PowerPoint presentation on how cigarette smoking plays a major role in the U.S. fire problem, by not only serving as the ignition source of fires, but also by fostering a culture where fire and fire tools are recklessly common place.

Electric and Natural Gas Safety for First Responders – First on scene, first responders need to be able to identify and handle all potential dangers. This session will show ways to prevent and reduce potential hazards by providing a visually effective presentation on electric safety and natural gas safety.

Tornadoes to Terrorist – Are You Prepared? – Learn how to train your community on CERT. CERT deals with all hazards found in your community. The focus of this program is to promote personal accountability and provide skills in the preparedness of teaching how to take care of yourself, your family and ultimately your community for the initial 72 hours of a disaster.

Arkansas Firesetter Intervention Program - A presentation of case studies of children who have been burned or who have died while "playing" with fire in Arkansas. The program also includes discussion on the successes and challenges involved in creating a statewide youth firesetter intervention program there.

Spanish for First Responders – The goal of this class is to help first responders achieve the basic Spanish needed to better equip them when contacting Spanish speaking individuals. The objective is not geared toward teaching responders the Spanish language, but rather familiarizes them with conversational Spanish and phrases.

Working with the Media – Effective media relations begin before a crisis. Whether promoting an upcoming event or answering the tough questions associated with an emergency incident, learn how to reach your desired audience through your local and metro-wide media. The role of the Press, the role of the PIO and basic interview skills will be covered – with video clip examples included.

Home Fire Sprinklers and the Public Fire Safety Educator – This session will cover the history of fire sprinklers, adoption of Fire Codes pertaining to home fire sprinklers, why homes need them, and how to use this information for a home fire sprinkler coalition.

Safety Shrek – Education through Characterization – See how effective using puppets, clowns and popular songs rewritten with safety messages can be to teach fire and life safety to children. This program is a spin off of Shrek. Shrek, Donkey, Fiona and Pup in Boots journey to the land of Safely Ever After as they learn important messages about all types of safety.

Keynote - Finding Humor in the Crazy World of Emergency Services:
Welcome to the Dark Side – Those working in the field of emergency services often times have to respond to scenes involving horrific trauma and death, and yet they must not only keep working the remainder of their shift, but they must do it again the next day and the next. How do they do this? For many, gallows humor offers a momentary respite from their sense of loss and pain. Most people outside our professions view this as going beyond the bounds of good taste. But we know in spite of such tragedies, amusing incidents happen anyway, and that sometimes humor is the only weapon we have. Sometimes it's just an inner chuckle that tells us "we'll get through this."
